

IN THE SPECIFICATON

The first paragraph on page 9, which continues the last paragraph on page 8, in the substitute specification is amended in the following:

The second front positioning plate 22 is disposed in the recess 215 of the second base disk 11 with a hollow center 222 for being inserted with the insert head 141. A plurality of radial grooves 223 extend from the periphery of the hollow center 222 equidistantly and two opposite ones of the radial grooves 223 constitute a space available for being passed through with the pin 142 of the insertion member 14. An elongated ~~nest~~ recess 224 is provided between every two neighboring radial grooves. In addition, the second front positioning plate 22 is provided with through holes 221 corresponding to the threaded holes 211 of the second base disk 21 and each of the threaded holes 221 is composed of two opposite countersinks and surrounded with a conical end 2211 extending outward from the top thereof.
